PROFESSIONAL SUMMARY

Flutter & Mobile Application Developer with 5 years of software engineering experience, specializing in architecting and shipping production-grade cross-platform fintech applications. At Inventiva Tech, spearheads the delivery of live investment and wealth management apps on the Apple App Store and Google Play Store with a core focus on Clean Architecture, scalable state management (Riverpod, BLoC, Stacked), polished 60fps UI/UX animations, and high performance. Combines deep Flutter & Dart specialization with 3 years of prior React frontend engineering, acting as a clear communicator and dependable collaborator across remote product teams, founders, and fellow engineers.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Cross-Platform iOS & Android Engineering, App Store & Google Play Release Management
Architecture & State	Clean Architecture, Riverpod, BLoC, Provider, Stacked, Dependency Injection (`get_it`), Modular Codebases
Backend & Integrations	RESTful APIs, Firebase, Authentication Flows, Deep Linking & Custom URL Schemes, Secure Session Management
Product & UI Engineering	Complex UI/UX Implementation, Custom Animations, Performance Optimization, Responsive Interfaces, React
Collaboration & Delivery	Direct Founder Collaboration, Cross-Functional Teamwork, Technical Communication, Remote Async Delivery
Tools & Workflow	Git & GitHub, Jira, Notion, Slack, Google Meet, Zoom

WORK EXPERIENCE

Mobile Application Developer — **Inventiva Tech** **March 2025 – Present**

- **Spearhead** the full development lifecycle of deployed production fintech mobile applications (**FSL Capital** and **AssetPro by GTI**), taking products from architecture and implementation through live release on the Apple App Store and Google Play Store.
- **Architect** modular, maintainable mobile codebases using Clean Architecture, `get_it` dependency injection, and modern state management (Riverpod, BLoC, Stacked), delivering responsive, animated interfaces optimized for peak performance on iOS and Android.
- **Engineer** secure authentication flows, custom URL schemes, RESTful API integrations, and Firebase services, collaborating closely with backend engineers, designers, and product leads on rapid feature delivery.

Frontend Developer (React) — **Freelance** **2021 – 2024**

- **Partnered** directly with startup founders and small businesses on multiple confidential projects under NDA, translating early-stage product specifications into production-ready web software.
- **Built** responsive interfaces, reusable component systems, and RESTful API integrations in React, maintaining high code quality and scalable frontend structure across client engagements.
- **Executed** end-to-end remote project delivery, keeping stakeholders aligned through proactive written updates, regular sprint calls, and transparent milestone tracking.

PRODUCTION FINTECH PROJECTS

FSL Capital [Live on App Store & Google Play] **Flutter • Dart • REST APIs**

- Engineered a cross-platform asset management and securities trading mobile application within a collaborative engineering team, enabling users to execute trades, monitor real-time portfolios, and manage investment instruments securely.

AssetPro by GTI Asset Management [Live on App Store & Google Play] **Flutter • Clean Architecture**

- Developed core mobile workflows for fund transactions, live market analysis, portfolio performance tracking, and secure client account management across iOS and Android devices
